Sebastian Hoffmann

Web Developer

Sebastian Hoffmann • geboren 11.10.1992 • Thadenstraße 80, 22767 Hamburg • Tel. +49 171 9292 351 • [sebastian.hoffmann@shoff.de](mailto:sebastian.hoffmann@shoff.de)

# Job Experiences

From August 2021 until September 2023

**Senior Product Software Engineer** at Wolters Kluwer Software und Services GmbH

I am developing an Angular Application that allows Domain Teams to create their Frontends using a Kotlin DSL. This way, none of their developers need to learn about any web technologies and can remain in their Java/Kotlin world.

I am involved in the development of the Application itself, maintaining the Kotlin DSL as well as making bigger architectural choices. I also regularly support the Domain Teams in using our Kotlin DSL.

---

May 2018 until April 2021

**Web App Engineer** at sum.cumo GmbH

I built the Online Application Forms of the die Bayerische insurance firm. Here I was involved in the development and maintenance of the application, its automated testing as well as the entire deployment process.

I was also involved in moving the infrastructure of the development- and demonstration environments of an Inventory Records Software.

---

October 2017 until March 2018

**Consultant** at ERGON Datenprojekte GmbH

I was working on several Customers Projects as an external Developer and Consultant:

- Continued development of a large Order- and Shopping System
  - Continued development of an administration and billing system for a HR redistribution company
  - Development of a system for booking advertisement areas for one of the leading agencies for outdoor advertisement
- 

July 2013 until September 2017

**AngularJS developer** at Dataport AöR

I build and maintained a large administration platform for the management of the Active Directory Accounts of our company and our customers using AngularJS.

I built most of the core functionality of the frontend, including a dynamic generator for most pages and forms.

Sebastian Hoffmann • geboren 11.10.1992 • Thadenstraße 80, 22767 Hamburg • Tel. +49 171 9292 351 • sebastian.hoffmann@shoff.de

I was also in charge of maintaining our dependencies, most of the refactoring work as well as the build process using grunt.

## Training

September 2010 until July 2013 Apprenticeship to become a „**Fachinformatiker für Anwendungsentwicklung**“ at Datapsort AöR

Java, SQL/MySQL, Python
